

Task 24.10.2024

1. Create the following list of Strings: ["Patryk", "Alex", "Ian", "Kevin"]

Then write a program that:

- A. Prints out all values separately (1p),
 - B. Prints out second value (Alex) (1p),
 - C. Checks the length of a list (1p),
 - D. Replaces all names with a word "Tomato" (1p).
2. Create the following list of Integers: [2, 4, 8, 12, 1, 67, 31]

Then write a program which:

- A. converts all two-digit numbers into any object of String type (2p),
- B. Prints the lowest value (2p).
